## 10. Additional Returning Officer Comments

- a) Did the e-poll books and tabulator help serve electors with disabilities more effectively? Please explain.

No, it took the same amount of time to process electors with disabilities. It was difficult for electors with mobility disabilities to wait in line to cast their ballot.

- b) Please describe any situation you observed where electors with disabilities used their mobile devices (e.g. phones, iPads and tablets) as an assistive device during the voting process. Were there any issues or concerns?

None.

- c) Please describe other measures that you took to provide accessibility for electors with disabilities in your electoral district.

Since many of our polling locations are in older or heritage buildings, it was difficult to have a single entrance, elevators or accessible lifts located at the front door. The use of remediation Information Assistants (IA) was perfect because it allowed for each elector to be greeted, then directed to the most appropriate entrance and aided with the elevator. For the special ballot home visit, we used gel or marker style pens because even with large grip pencils, it is still difficult for many people to put enough pressure to mark the paper.
