10. Additional Returning Officer Comments

- a) Did the e-poll books and tabulator help serve electors with disabilities more effectively? Please explain.

Yes, the new technology provided flexibility in serving electors with disabilities.

- b) Please describe any situation you observed where electors with disabilities used their mobile devices (e.g. phones, iPads and tablets) as an assistive device during the voting process. Were there any issues or concerns?

None.

- c) Please describe other measures that you took to provide accessibility for electors with disabilities in your electoral district.

Chairs were made available for electors. At one location we received a call from a family member of an elector who expressed concern about bringing the elector in to vote during peak times as the elector has a mental illness. The Supervising Deputy Returning Officer (SDRO) offered to come to the lobby to allow the elector to vote in a space that the elector felt comfortable in.

At another location the polling staff assisted a family member of an elector who has Alzheimer's. They also assisted another elector with a cognitive/developmental disability.

At another location the SDRO was approached by family members of an elector who has a mental health illness requesting to arrange a home visit on election day. The SDRO informed them that this was not permitted on election day and suggested that if they brought the elector by car to the polling location, that they could vote while remaining in the car. They returned with the elector and the SDRO processed the electors' ballot.
